Conditional Probability Matching Answers

The Monty Hall problem is a brain teaser, in the form of a probability puzzle, loosely based on the American television game show Let's Make a Deal and named after its original host, Monty Hall. The problem was originally posed (and solved) in a letter by Steve Selvin to the American Statistician in 1975. It became famous as a question from reader Craig F. Whitaker's letter quoted in Marilyn ...

Monty Hall problem - Wikipedia

The familiar Bool is the simplest common example of a category of type called an algebraic data type. An algebraic data type can have more than one value constructor.-- file: ch03/Bool.hs data Bool = False | True. The Bool type has two value constructors,
