Medical imaging is the technique and process of imaging the interior of a body for clinical analysis and medical intervention, as well as visual representation of the function of some organs or tissues ().Medical imaging seeks to reveal internal structures hidden by the skin and bones, as well as to diagnose and treat disease.Medical imaging also establishes a database of normal anatomy and ...

Medical imaging - Wikipedia

Neurology suffers when it separates itself too far from the problems of medicine as a whole, and psychiatry, he believes, has suffered from such artificial separation. Thus, the neurologists' objection to a great deal of the Freudian conception of the neuroses is not due to the conclusions but to the loose
