...

Remember from Unit 7 that the producer's surplus on a unit of output is the difference between the price at which it is sold, and the marginal cost of producing it. The marginal cost of the 2,000th loaf is €1.25; since it is sold for €2, the producer obtains a surplus of €0.75.

Unit 8 Supply and demand: Price-taking and competitive

...

When the economy went into recession in 1938–39, the deficit shrank from its peak of 5.3% in 1936 to 3% in 1938. This was another mistake that reinforced the downturn. The big increase in military spending from early 1940 (well before the US entered the Second World War in late 1941) contributed to the recovery.
